

Eric Peryer is currently Associate Director, Research leading the Sterility Assurance team in Baxter's Medical Products & Therapies business. Current responsibilities include supporting terminal sterilization for new product development and changes to existing products across the globe as well as microbiology laboratory operations, disinfectant efficacy, and global pathogen safety. Eric has over 25 years of experience in the pharmaceutical industry including formulation development, installation and validation of cleanroom and aseptic processing equipment, and terminal sterilization of IV drug solution and medical devices.

Eric has been an active PDA Midwest Chapter Board Member since 2020, is currently serving as the chapter's Secretary, and is co-chair for the chapter's annual conference on microbial contamination and control.

Eric has a B.S. degree in Chemical Engineering from Clarkson University in Potsdam, New York.
