

Jonathan (Jon) Kallay is a Senior Technical & Market Development Manager working remotely for the Microbial Solutions product lines. Jon worked over a decade in a variety of CDMO QC Micro laboratories and is a subject matter expert on microbiological investigations for manufacturing facilities that make regulated products. Jon provides practical laboratory experience to help clients identify the optimal path forward for their labs. Jon received his Bachelor's degree in biochemistry from Denison University before earning a post-graduate diploma in pharmaceutical microbiology from the University of Manchester.
