

Jonathan (Jon) Kallay is a Senior Technology & Market Development Manager working remotely for Charles River Laboratories. He specializes in the Microbial Solutions product lines and provides practical laboratory experience to help clients identify the optimal path forward for new technology in their labs.

Jon is a subject matter expert on microbiological investigations for manufacturing facilities that make regulated products. Jon documents his history of pharmaceutical contamination investigations on Charles River's Eureka blog and through presentations at industry conferences, including PDA Events.

Jon received his bachelor's degree in biochemistry from Denison University before earning a post-graduate diploma in pharmaceutical microbiology from the University of Manchester. He has been an active PDA Member since 2021.
