

MEMO

DATE: 24 July 2025
TO: PDA Midwest
FROM: Shannon Walker
SUBJECT: Nomination for Member-At-Large

To Whom It May Concern,

Shannon Walker is a subject matter expert for Ecolab Life Sciences sector, focusing on contamination control in the pharmaceutical space. She is driven by a passion for shaping a better future through science. As a Chemical Engineer, she began her career in wastewater treatment for pharmaceutical companies and developed treatment systems for large and small-scale manufacturers. She has moved through the on-site engineering and manufacturing roles into territory engineering support and technical business development, providing customer support to meet compliance needs and ultimately patient safety.

Shannon has built a career at the intersection of innovation, collaboration, and purpose by partnering with pharmaceutical and biotech organizations to deliver solutions that improve lives. Currently serving at Ecolab Life Sciences, Shannon leads strategic initiatives that support cleanroom and contamination control programs across critical manufacturing environments while staying ahead of regulatory changes and client corporate initiatives.

Her nomination for Member-at-Large reflects a desire to give back to the life sciences community by promoting the exchange of ideas across disciplines, supporting professional development, and fostering inclusive dialogue. Shannon brings a unique blend of industry expertise, strategic thinking, and heartfelt commitment to the mission of improving global health.
